

# Bikramjit Singh

## Senior Principal Architect — Desktop Publishing & CCMS

Mohali, Punjab, India      +91 98729 66570    bikramjits77@gmail.com    [linkedin.com/in/bikramjit-singh-97b6b06](https://www.linkedin.com/in/bikramjit-singh-97b6b06)

---

### PROFESSIONAL SUMMARY

Senior Principal Architect with 23+ years of enterprise software engineering experience in Desktop Publishing and Component Content Management Systems (CCMS). Deep expertise in cross-platform publishing pipelines, structured XML/DITA authoring workflows, and embedding modern web technologies (CEF, Angular) into C++/C# native desktop applications. Proven track record of owning complex subsystems end-to-end — from typography engines and 64-bit platform migrations to REST microservice integrations — across Windows and macOS. Azure AI Engineer certified.

### CORE COMPETENCIES & TECHNICAL SKILLS

|            |                                                                                                                                                        |
|------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| Languages  | C# · C++ · Objective-C / Cocoa · Java · JavaScript · XSLT / XML                                                                                        |
| Frameworks | .NET 4.6.2 · Angular 19 · CEF 146 · DITA / Smart Content XML · JNI                                                                                     |
| Tools      | Visual Studio 2022 · VS Code · XCode · Postman · Eclipse                                                                                               |
| Platforms  | Windows 10/11 · macOS (10.4+)                                                                                                                          |
| Domain     | Desktop Publishing · CCMS · Structured Authoring · REST/SOAP Microservices · XTension Development · Unicode / ICU / Typography · Publishing Automation |
| Cloud / AI | Microsoft Azure (AI Engineer Associate) · Claude AI / Anthropic APIs                                                                                   |

### PROFESSIONAL EXPERIENCE

#### Quark Publishing R&D (India) Pvt. Ltd.

Aug 2010 – Present

Mohali, Punjab, India

*Senior Principal Architect*

Jul 2025 – Present

*Senior Principal Engineer*

Apr 2024 – Jun 2025

*Principal Engineer*

Nov 2020 – Mar 2024

*Senior Technical Lead*

Apr 2013 – Oct 2020

*Technical Lead*

Aug 2010 – Mar 2013

#### QPP Adapters — Quark XML Author & Microsoft Office (Word / Excel / PowerPoint)

- Architected and led migration of QPP Adapter integrations from legacy SOAP-based QPP Server to REST microservices, modernizing the backend interoperability layer for enterprise CCMS deployments.
- Designed a CEF (v146) browser-embedded wrapper library enabling Angular 19 web components to render natively inside C# and C++ desktop applications — eliminating a parallel UI stack and reducing long-term maintenance overhead.
- Integrated Angular 19 reusable component library into .NET 4.6.2/C# native applications (Word, Excel, PowerPoint adapters), enabling shared web/desktop UI assets across the QPP NG product suite.
- Delivered 5+ enterprise CCMS workflow features — Bulk Workflow, Content Automation Rules, Auto Burst Component, Pinning & Locking, and Privilege Support — expanding structured-authoring capabilities for enterprise publishing clients.

#### QuarkXPress Application (v9.x – 14.x)

- Delivered Indic language support in the QuarkXPress 14.2 text engine; overhauled ICU (Unicode), HarfBuzz (text shaping), and Hunspell (spell-check) library infrastructure to support nearly 10 Indian scripts, enabling Quark to address the Indian publishing market.
- Component owner of the hyphenation and spell-checking subsystem (QXP 13.0+), maintaining and improving quality across 5 major product releases.
- Extended QXP 13.0 image editing capabilities by porting ~20 algorithms from the Image Pump Library, adding graphic editing operations directly to the layout engine.

- Led 64-bit/Cocoa migration of QuarkXPress XTension components for v10.0, decoupling tightly-coupled UI/core logic to support the new macOS Cocoa architecture across ~10 XTensions.
- Recovered critical corrupted QuarkXPress documents (v7.x – current) for ~50 enterprise customers via low-level binary analysis, directly preventing data loss and reducing support escalations.

#### **QuarkXPress Server & XTension Development Kit (XDK)**

- Improved resilience of the Java-based headless publishing server by implementing proactive health checks and automated renderer restart logic, increasing uptime for high-volume automated publishing pipelines.
  - Provided Tier-3 API support to third-party XTension developers; resolved critical integration issues and implemented customer-specific XTensions against tight SLAs.
- 

### **Infosys Technologies**

Dec 2007 – Aug 2010

#### **Module Leader — Finacle Core Banking (Connect 24 / Interfaces)**

- Led offshore/onsite support for the Interfaces team of Finacle (v7.x, 9.x), serving ~10 global bank clients through system integration, post-go-live maintenance, and product migration cycles.
  - Drove root-cause analysis and patch delivery for production-critical incidents, reducing MTTR for banking clients; traveled onsite to client sites for training and issue resolution.
  - Mentored 4 junior engineers; managed resource allocation and incident triage for the team.
- 

### **Quark Media House Pvt. Ltd.**

Nov 2004 – Nov 2007

#### **Senior Software Engineer → Member, Software Development**

- Refactored and enhanced the QuarkXPress Spell-checking XTension (v6.5–7.x), adding case-sensitive error detection, doubled-word detection, and URL/number-ignore rules — expanding spellcheck accuracy beyond word-level errors.
  - Contributed to the Unicode text engine for QXP 7.0; resolved performance bottlenecks and memory corruptions in QXP 6.5.2 and 7.01 (Universal Binary/Mac) using DevPartner Studio (Windows) and Shark (macOS).
  - Resolved third-party XTension developer queries, authored sample XTensions, and created a parser tool for the Quark Developer Reference (QDR) documentation.
- 

### **EARLY CAREER**

#### **D.A.V. College, Phagwara (Mohan Lal Uppal)**

Jun 2002 – Nov 2004

#### **Lecturer — Computer Science**

- Taught C++, Data Structures, and Computer Architecture to M.Sc. (IT) / BCA classes; managed department IT infrastructure and served as Centre Superintendent for university final examinations.

### **HCL Technologies** Dec 2000 – Jan 2002

#### **Software Engineer**

- Worked on internationalization (Unicode / multi-byte encoding) of SNMP Manager, Message Parser, and DB Abstraction DLL (VC++) for client GASPER; conducted ATM OS/2 driver and NDC+ migration study for NCR (onsite training, Dundee, Scotland).

### **Open Technologies India Pvt. Ltd.**

Jan 2000 – Dec 2000

#### **Software Engineer (incl. 6-month traineeship)**

- Built a Java Native Interface (JNI) bridge enabling Java-based OpenNET products to invoke C-language Elink networking APIs; performed maintenance and enhancements on the Elink Manager GUI.

## EDUCATION

**MCA (Master of Computer Applications)** — Guru Nanak Dev University, Amritsar 2000

**B.Sc. (Mathematics Honours)** — University of Delhi 1997

## CERTIFICATIONS

**Microsoft Certified: Azure AI Engineer Associate** — Jan 2026 | Credential: EDF1194FE440D4CC

**Claude Code 101** — Anthropic, Apr 2026 | Credential: 8iohkgf3q53m

**Claude 101** — Anthropic, Apr 2026 | Credential: nucm2h5obpgp

## ADDITIONAL

Attended Apple WWDC 2006, San Francisco | Onsite engagement: Dundee, Scotland (HCL / NCR ATM project, 2001)
